

TAC

TEST APPLICATIONS CENTER

Extending the life of legacy ATE.

TEST APPLICATIONS CENTER

MVTS provides the following services for customers:

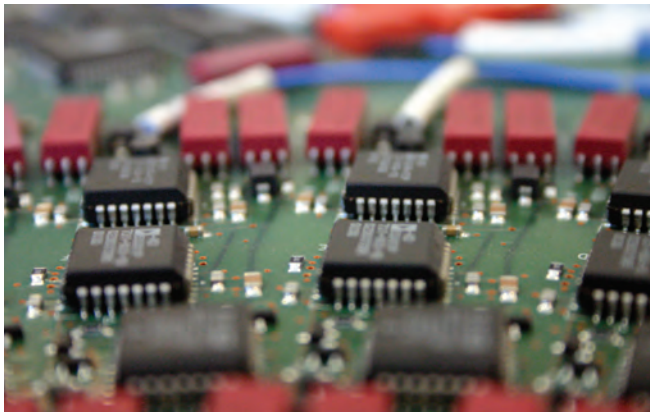

- Multiple Test Platform Solutions
- Design and manufacture unique docking and test hardware
- Custom interface solutions for current and legacy testers
- Refurbishment or replacement options to your docking schemes
- Extend the life of your test investment

MULTIPLE TEST PLATFORM SOLUTIONS

Extensive selection of the latest technology in testers

Access to a Wide Range of Testers

MVTS offers access to multiple test platforms which can be configured to allow our customers to choose which platform suits their engineering test development, debug or production needs and ensures the quickest and most cost effective time to market for their devices.

Test Time Rental Services

System time can be rented and accessed at convenient locations locally or through remote means to make the best use of the engineer's time and enable our customers' success.

RF CATALYST

MVTS United Kingdom TAC floor recently installed an RF Catalyst

TEST PLATFORMS

Broad range of testers

TEST PLATFORMS	MS	RF	Digital	Power	Memory
Teradyne J750			•		
Teradyne Catalyst	•	•	•	•	
Teradyne A5xx	•	•	•	•	
LTX Synchro / Fusion AC/HT	•	•		•	
LTX Master Series/STE	•		•		
LTX Fusion HF	•		•		
LTX Fusion "X" Series	•	•	•	•	
Credence Quartet OnePlus	•		•		
Credence SC212	•		•		
Credence Kalos					•
Credence ASL 1K	•		•		

Other testers available, please call for availability.

TEST DEVELOPMENT ENGINEERING SERVICES

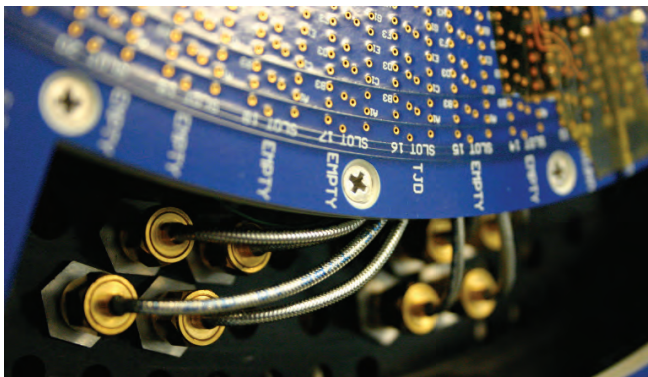

Flexible capacity and capability

- Turnkey and Project Applications Development
- Optimization of Test Programs
- Test Platform Conversions
- Docking and Interface Expertise
- Custom PCB Design
- Probe Card Design Services
- Device Characterization Services

Application Project Management

MVTS TAC management services utilize proven practices to guarantee customer satisfaction. TAC management focuses on the customers' business objectives, all facets of the development project, required cost targets and performance goals to ensure that the test application development delivers what the customer needs.

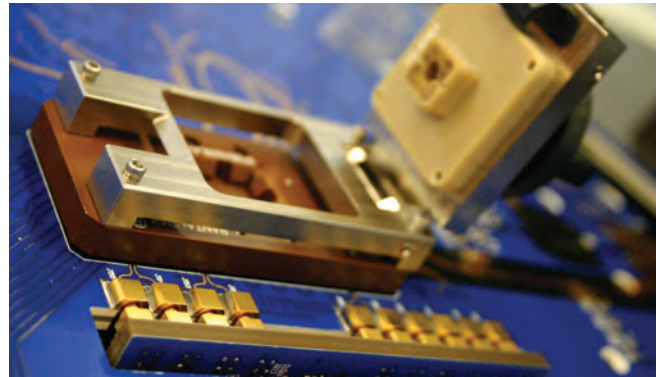

Industry Experience

MVTS provides seasoned test engineers with many years of experience to develop application projects on a multitude of ATE platforms. MVTS's experience is built on solving all test and interface challenges from specification to volume production.

Technology Expertise

MVTS test engineers provide solutions for volume production test, specializing in test techniques and solutions for new and emerging technologies including:

- Broadband and Data Communication devices
- RF and Wireless Baseband devices
- Power Management devices
- Processors and Memory devices
- Automotive devices

INTERFACE SOLUTIONS, SOCKETS & CHANGE KITS

Simplifying the release to production process

Interface Solutions

MVTS provides professional services for all hardware and software docking solutions. This expertise provides our customers with robust final test solutions. With over 50 years of experience, MVTS is the preeminent mechanical and electrical interface provider.
